Homework #4

Due: November 9

Part 1:

Research the LoadStorm tool.

http://loadstorm.com/

Write a one-page summary of the tool addressing the following:

1. Capabilities

2. What types of problems the tool detects and what type of problems it does not look for

3. Describe how the tool might be used to support regression testing.

Part 2:

Write a one-page summary of the challenges and possible approaches for regression testing mobile applications.

In CSE 565, all work must be done individually unless otherwise instructed and must be original. Papers must be written in your own words (no cutting and pasting). References to all work must be cited where used in the paper and included in a bibliography at the end of the paper.
