Homework #5

Due: November 30

Compare each of the tools identified below:

M-SRAT
http://www.ijpe-online.com/attachments/article/889/pp.369-379-Paper-7-IJPE-594.14--p.11.pdf

Frestimate
http://www.softrel.com/1About_Frestimate.html

Your comparison should address:

1. Inputs, outputs and assumptions made by each of the approaches
2. For each of the assumptions, explain how reasonable the assumption is
3. How early in the software development life cycle can each tool be used

Your paper should be 2 pages.

In CSE 565, all work must be done individually unless otherwise instructed and must be original. Papers must be written in your own words (no cutting and pasting). References to all work must be cited where used in the paper and included in a bibliography at the end of the paper.
